

Guide for E-mail in Thunderbird

1. Open up your thunderbird application and press Email at the start screen.

Thunderbird Mail - Lokala mappar

2. After you've pressed Email, write in your Name, Email address and Password. Then press Continue

The screenshot shows a dialog box titled 'Set Up an Existing Email Account'. The dialog box has a title bar with a close button (X) in the top right corner. The main content area contains the following fields and options:

- 'Your name:' field with the text 'Design Test' and the label 'Your name, as shown to others' to its right.
- 'Email address:' field with the text 'igntest@intenditmail.se' and the label 'Your existing email address' to its right.
- 'Password:' field with a series of black dots representing the password.
- A checked checkbox labeled 'Remember password'.

At the bottom of the dialog box, there are three buttons: 'Get a new email address...' (disabled), 'Continue' (active, with a mouse cursor pointing to it), and 'Cancel' (disabled).

3. After a short while thunderbird will say that it can't connect with these settings and you need to input the IMAP and SMTP settings yourself.

For IMAP write: post.intendit.se – Use port 993 and SSL/TLS, also make sure to use “Normal Password” for Authentication

For SMTP write: post.intendit.se – User port 25 and Chose STARTTLS, also make sure to use “Normal Authentication”

Set Up an Existing Email Account

Your name: Design Test Your name, as shown to others

Email address: igntest@intenditmail.se Your existing email address

Password: [masked]

Remember password

⚠ Thunderbird failed to find the settings for your email account.

	Server hostname	Port	SSL	Authentication	
Incoming:	IMAP	post.intendit.se	993	SSL/TLS	Normal password
Outgoing:	SMTP	post.intendit.se	25	STARTTLS	Normal password

Username: Incoming: designtest@intenditmail.se Outgoing: designtest@intenditmail.se

Advanced config Re-test Done Cancel

4. Now press done and your email is now ready to use
