

Guide for Outlook 2016

1. First when you open up Outlook it'll give you this view.

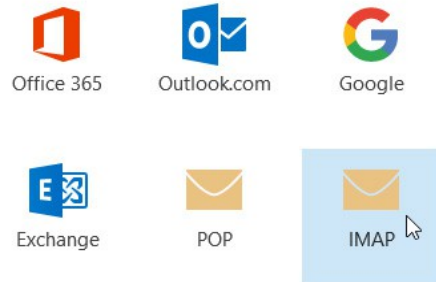

2. Press the text Advanced options / Avancerade Alternativ and check "I want to manually configure my account" / "Jag vill konfigurera mitt konto manuellt"

3. Once upon the next page, press the option called IMAP

Välj kontotyp

4. This next step is where you configure your account to our servers, so follow closely. where it says Inkommande E-post / Incoming E-mail server you need to input the following.

post.intendit.se and use the port **993**. You also have to change the Encryption type to **SSL**

For outgoing e-mail / Utgående E-post you have to do the same. You need to enter the following in the server field: **post.intendit.se** and use the **STARTTLS** Encryption method with the port **2525**

IMAP-kontoinställningar [\(Inte du?\)](#)
designstest@intenditmail.se

Inkommande e-post
